CHOOSING SignorBIO

Choosing SignorBIO means selecting products that prioritize environmental respect, **crafted from plant-based materials in factories with certified processes.**

Unlike many bioplastics typically used for cutlery, **SignorBIO products are genuinely biodegradable in natural settings.** There's no need for specific degradation processes in waste treatment plants. **If left in nature, they naturally decompose, allowing plant fibers and wood to return to the soil.**

**Sugarcane
fibre line**
resistant to hot food
and liquids.

choose WOOD

Wood, inherently eco-friendly by nature. That's why we've launched a premium line of truly organic plates and cutlery, crafted solely **from natural poplar and birch wood.**

- GOOD LOOKING**
Characterized by its natural hue and delicate grain.
- NICE TO TOUCH**
Smooth natural feel, enhanced by a beeswax-based coating.
- STRONG TO USE**
Both flexible and durable.

Our production process is straightforward:

- 1. PEELING:** using the tree trunk, a renewable resource.
- 2. MECHANICAL PRESSING:** to carve and mold each product from the wood sheet.
- 3. WASHING:** to refine and sanitize every individual item.

Why resort to synthetic alternatives when the perfect solution is already present in nature?

Thanks to a unique coating derived from natural beeswax, our cutlery is **SMOOTH, LIQUID-RESISTANT**, and entirely **DEVOID OF ANY AFTERTASTE**. It's the perfect product for savoring any dish, with the added benefit of being made from **100% NATURAL MATERIAL.**

Bees produce the wax to construct the hexagonal cells of the honeycomb where they store honey.

choose

PAPER

FSC mix certified cardboards products

A Timeless Classic.

For our collection of **fully recyclable cups**, round and rectangular bowls, as well as soup bowls, we've opted for PE-coated cardboard—a material replete with benefits. Additionally, all our bowls and cups come **with special lids, making them perfect for takeaway.**

THE MOST KNOWN:

a straightforward and universally recognized option.

WATERPROOF:

enhanced with a unique coating, ensuring the bowls are completely oil-resistant.

TWO COLORS:

catering to diverse preferences, our bowls and straws come in either white or kraft color.

Explore our cup specifically crafted for vending machines on pag. 107

FROM RESPONSIBLE FORESTS

All wood and cardboard products are certified according to the FSC national Forest Management standards.

The responsible Forest Management certification ensures that a forest or a forest plantation is managed in compliance with strict environmental, social, and economic standards.

These standards are based on the 10 Principles and 70 Criteria (Principles & Criteria, P&C) of responsible forest management, **defined and kept up to date by FSC** with the participation of all interested parties.

FSC certified SignorBIO products

To learn more, visit the official Forest Stewardship Council website: it.fsc.org.

choose

SUGARCANE FIBRE

GREEN ECONOMY:
a resource derived from
repurposing plant waste.

PLEASANTLY REFINED:
an elegant range in creamy
white, velvety to touch and
gracefully contoured.

PRACTICAL:
sturdy plates and cups
suitable for both cold
and hot dishes.

Explore our containers
tailor-made for
food storage and
transportation on pg. 68

**This material is sourced
by macerating the
leftover fibres from
sugarcane processing.**

During paper sheet
production, a pulpy liquid
rich in cellulose fibres
is generated. This pulp is
subsequently thermoformed
into a range of moulds.

Vanishes in your home compost bin!

PFAS FREE PRODUCTS

WHAT ARE PFAS?

PFAS, an acronym for per- and polyfluorinated alkyl substances, belong to a group of synthetic chemical compounds, with almost 5000 known variants. Not found in nature, their production began in the latter half of the 20th century. Chemically, they are composed of carbon chains where hydrogen atoms are replaced by fluorine atoms, either fully (perfluorinated) or partially (polyfluorinated).

WHY ARE PFAS USED IN FOOD CONTAINERS?

Their water-repellent and anti-grease nature makes them ideal as barriers in food packaging, **allowing for an extended preservation of food** compared to untreated containers.

PFAS REGULATION IN THE EU

Since 2009, specific substances like PFOS have been regulated at an international level, with the EU introducing specific restrictions over the years. Other substances, such as PFOA, were banned more recently, while new regulations were introduced in 2023. The intricacies and evolution of this legislation can be further explored on the Stockholm Convention website.

REACH RESTRICTIONS

The EU has implemented various PFAS restrictions since 2023.

These decisions stem from proposals and assessments made by various member countries and bodies like ECHA. For details and updates on REACH restrictions, one can refer to the official ECHA website.

SignorBIO APPROACH

SignorBIO has always aimed to provide sustainable products, operating with full respect for the environment and current environmental regulations. With this in mind, we have conducted in-depth analyses throughout our value chain alongside our international suppliers, establishing strict compliance procedures.

The goal is to promote and ensure the monitoring of the use of per- and polyfluoroalkyl substances (PFAS) within our products.

Based on our production expertise and the information gathered from our supply chain, we can confidently state that **SignorBIO products do not contain intentionally added PFAS chemicals**. This includes, among others, perfluorooctanoic acid (PFOA), perfluorooctanesulfonic acid (PFOS), perfluorononanoic acid (PFNA), and perfluorohexanesulfonic acid (PFHxS).

We are investing significant resources and time in the research and development of a new oil-repellent agent that is completely free of fluorinated compounds. Our upcoming **sugarcane fiber product line, free from fluorinated use**, promises to offer performance on par with traditional products, marrying quality with environmental respect.

THE FRONT ROW BRAND

Opting for a disposable product isn't just a purchase; it's a conscious, eco-friendly choice. **Our products are not only easy to compost but also a delight to view, touch, and utilize.**

DISTINCT PALETTE: vivid and natural hues that make **our style stand out on the shelf.**

SEE-THROUGH DESIGN: transparent film to showcase the product, **emphasizing neatness, meticulousness, and hygiene.**

INFORMED CHOICES: double-sided labeling, providing **clear and thorough information.**

Accurate labeling is pivotal. It equips consumers with the knowledge and insights they deserve.

DIRECT IMPORT SERVICE

Explore our container configurator at
www.signorbio.com

Beyond our extensive in-stock product range, experience the advantages of direct import with the acquisition of a full container.

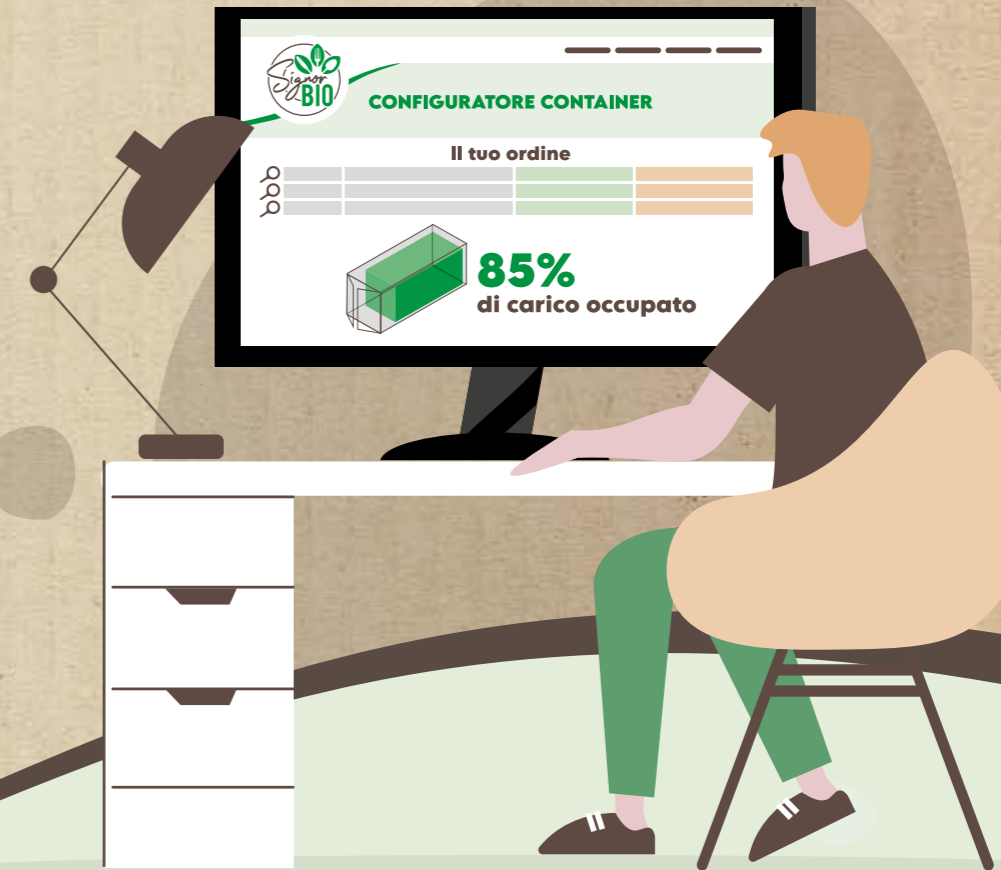

With our intuitive online container configurator, understand the process in **JUST 3 SIMPLE STEPS**:

- 1 CHOOSE THE CONTAINER SIZE**
- 2 SELECT THE ITEMS** from our catalogue that fit your needs.
- 3 SPECIFY QUANTITIES** for each product by denoting the number of pallets.

EXTRA FEATURE

If you operate multiple retail locations, simply **INPUT THE NUMBER OF YOUR STORES**. Our configurator will then break down the distribution of pallets, boxes, and individual items for each outlet.

IDEAL FOR FOOD TRANSPORTATION

The new sugarcane fibre containers are specially designed for food storage and service.

MAINTENANCE
60°/3 H

FRIDGE STORAGE
AT 4°

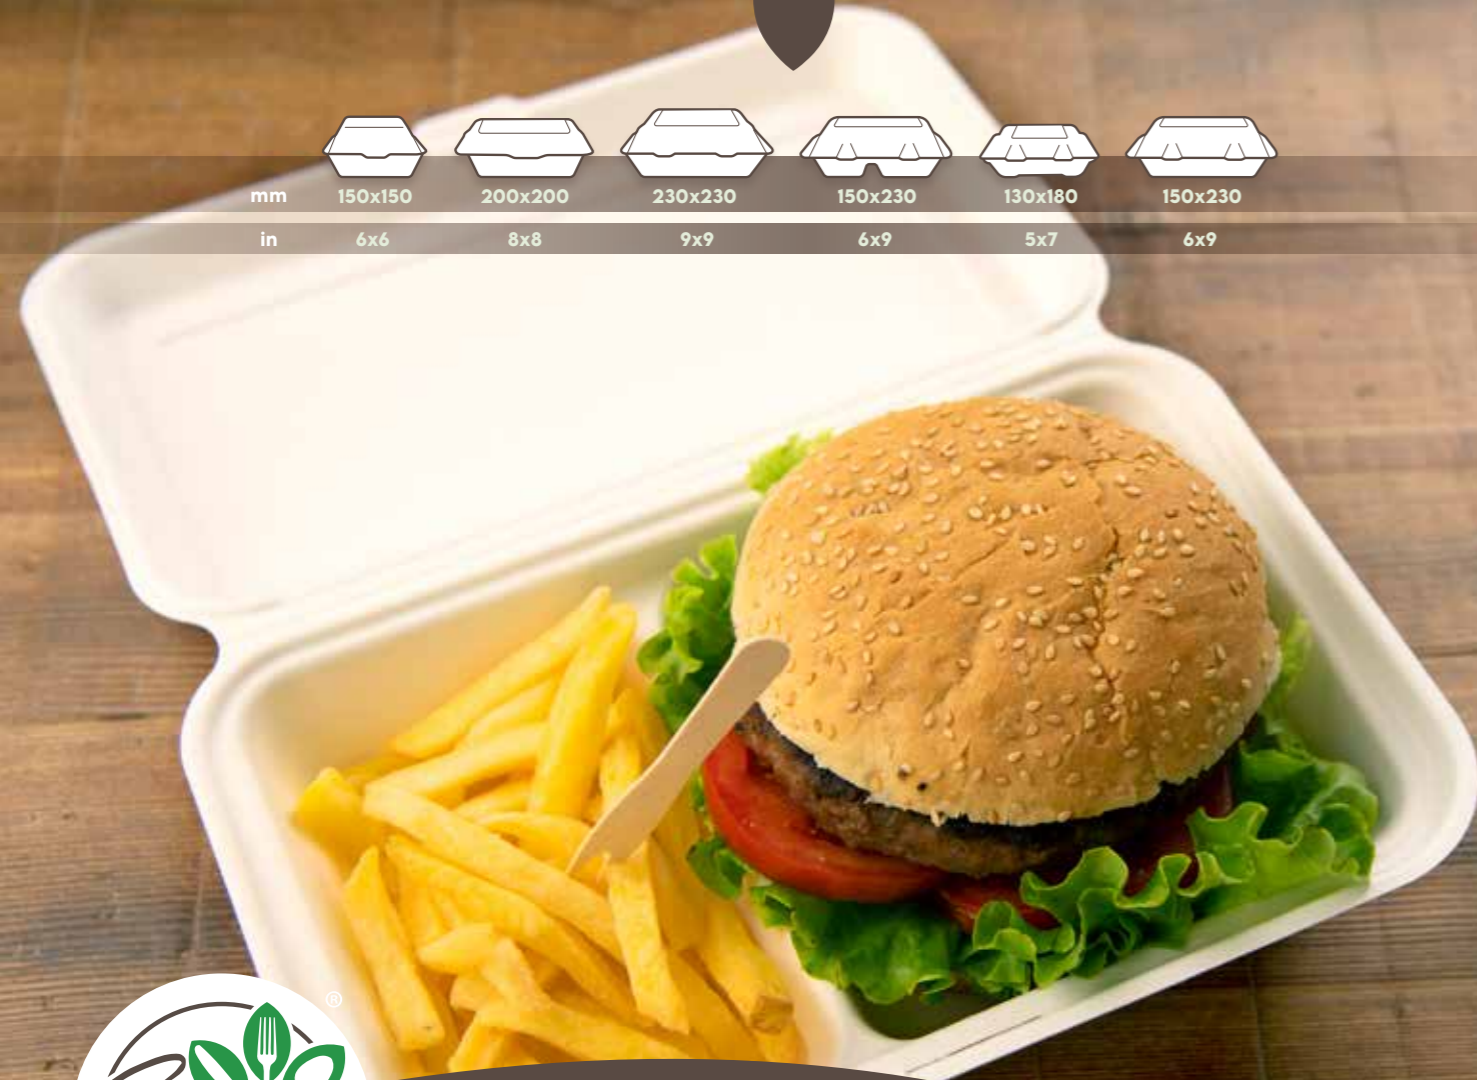

TRADITIONAL OVEN
(180°/20 min)
MICROWAVE
(800 W/4 min)

FREEZING
-18°C/10 DAYS

Thanks to the **custom-designed lids** and **heat sealing**, they keep food warm, can be frozen and reheated. Thanks to the **reinforced edges** they are stackable and shockproof, and do not deform during transport.

A WIDE RANGE FOR EVERY TASTE

FSC mix certified bowls

SQUARE
Elegance and optimization in one.

ROUND
The classic for every use.

SLIM
For hot, cold foods, and desserts.

RECTANGULAR
The alternative for deli counters.

100%
recyclable

PAPER

BOWLS

MAXIMUM PERFORMANCE

SUITABLE FOR HOT FOODS UP TO 85°C

IN CONVENTIONAL OVEN FOR 10 MINUTES AT 180°C

OIL PROOF. THE MOST RESISTANT, FOR 30 H AT 4°C

IN MICROWAVE FOR 4 MINUTES AT 800 W

STURDY AND STACKABLE STRUCTURE

IN FREEZER FOR STORAGE

SignorBIO cardboard bowls are **100% recyclable** as paper and fully customizable upon request.

They are **easy to open and close, and are stackable** to optimize space and transportation to the fullest.

FOR YOUR DELI COUNTER

The cardboard bowls are the ultimate **alternative to plastic containers, being the most resistant to oil and fats.** Thanks to the custom-fit lids and high performance, they can be **kept in the fridge** for up to 30 hours, **transported,** and **reheated.**

SALES TERMS & CONDITIONS

TOLERANCES

The following tolerances are accepted

- a) $\pm 10\%$ on the order
- b) $\pm 5\%$ on weights, measures and grammage.

ORDER PROPOSALS

Order proposals received by SignorBIO are deemed to be accepted if confirmed in writing by the same.

PRICE AND PAYMENTS

a) It is expressly agreed between the parties that **the sale price** is that indicated in the order confirmation issued by SignorBIO.

b) **Payments** shall be made within the terms set forth in the order confirmations.

c) On any **payment delays** interest shall be charged at the official discount rate plus 4%.

d) Any **disputes** shall not give rise to an interruption of payments.

e) **Non-fulfilment of the terms of payment** by the purchaser shall entitle SignorBIO to suspend deliveries in progress or to demand advance payment for them.

DELIVERY

Delivery times are to be considered indicative. Therefore, any delay in delivery shall not entitle the customer to claim any compensation for penalties or damages. SignorBIO reserves the right to make partial shipments and to issue corresponding invoices with the agreed terms of payment.

RETENTION OF TITLE

SignorBIO shall be entitled to retain title to the goods supplied until full payment for the supply has been made.

FORCE MAJEURE

Orders shall be deemed to have been placed unless prevented by force majeure.

These include, in particular: strikes, lockouts, war, fire, floods, earthquakes, power failures for any cause whatsoever, rail, ship or road disruptions and any other circumstances beyond the seller's control.

COMPLAINTS

Deficiencies or irregularities in the goods which can be ascertained from the documents must be notified in writing within 5 working days of receipt of the goods.

Any other failures or irregularities that cannot be immediately detected must be opposed in writing as soon as they are detected, but **no later than 12 months** after the issue of the sales documents. Furthermore, the customer undertakes to keep the non-conforming product and to make it available to SignorBIO.

IF IT'S STYLISH, IT TASTES BETTER

SignorBIO is a project created to offer disposable products that are **100% green**:

- State-of-the-art **logistic system**
- Capillare **transport network**
- Constant **attention to market trends** to always offer innovative solutions

**Do you want to go green?
Sit at the table with
SignorBIO.**
